

## Tuberculosis Prevention and Control Program

Please call the Butler County Health Department to speak to our TB Specialist (513-863-1770).

The local health department identifies people who have active TB, and those who have been in contact with TB patients to determine whether they have TB infection. We screen people entering or working in areas where they might be exposed to TB or might infect others. We also work with immigrants and refugees who need TB testing and or treatment.
